

Table stand and
air filtration system for
Roland DG UV Printer series

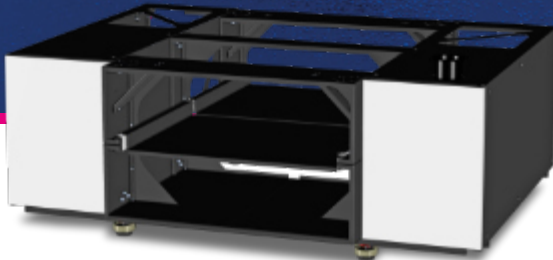

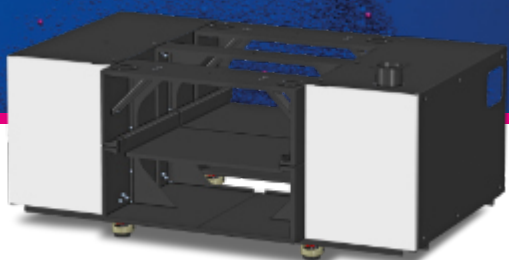

Our solution

ULT high quality air filtration

Technical specifications

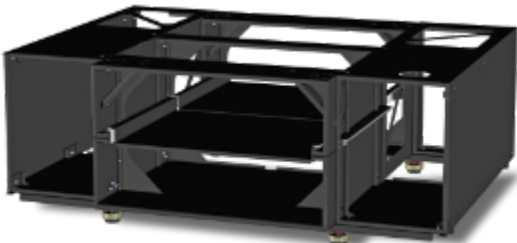

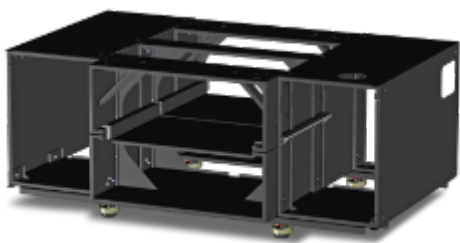

of the air filtration system

The RDG MO was developed exclusively and perfectly for the Roland DG UV printer. In addition to its exceptionally quiet operation, it is the perfect visual and technical complement to your printer. Device castors ensure mobility and flexibility - there is also plenty of storage space for accessories and consumables. Two versions are available: The "basic version" offers a stable table stand solution. The "standard version" includes an additional filter system to reduce odors during the printing process. All versions of the RDG MO are supplied **partially pre-assembled**. Detailed assembly instructions are available in writing and as a video.

The basic devices

	RDG MO-180	RDG MO-240
ULT order number	2-00299	2-00303
Dimensions (WxDxH)	1,440 x 903 x 588 mm 57 x 36 x 23 inch	1,592 x 1,210 x 588 mm 63 x 48 x 23 inch
Weight	102 kg / 225 lbs	115 kg / 254 lbs

Parameter	RDG MO-180 Standard	RDG MO-240 Standard
ULT order number	2-00298	2-00302
