Roland Edition
the rip for digital textile print production

RIP

Texart

Powerful textile RIP software with excellent high-speed RIP throughput.

Created by the premier RIP provider for the textile industry.
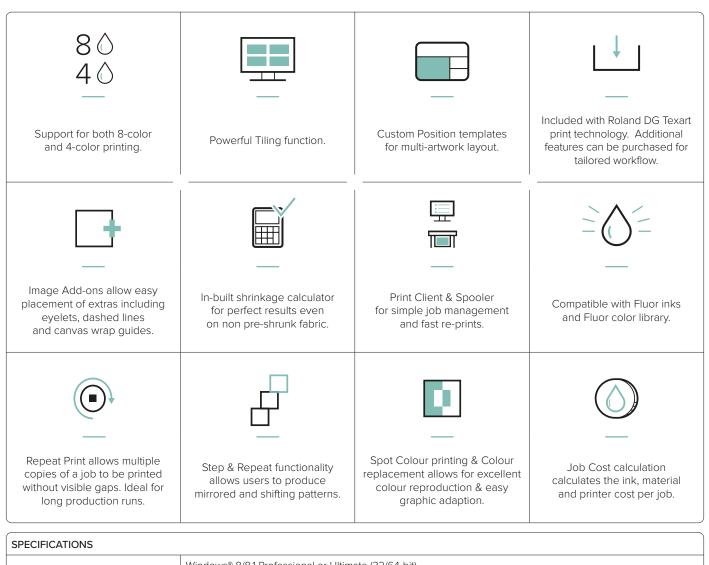

Designed for High Quality/High Production printing

Included with Texart Printers.

Welcome to Ergosoft Roland Edition, the future of textile RIP software.

Ergosoft Roland Edition was developed with the essential tools for textile production in mind, the ideal companion to Roland DG's Texart Dye Sublimation transfer printers.

Support for both 8-color and 4-color printing.

Powerful Tiling function.

Custom Position templates for multi-artwork layout.

Included with Roland DG Texart print technology. Additional features can be purchased for tailored workflow.

Image Add-ons allow easy placement of extras including eyelets, dashed lines and canvas wrap guides.

In-built shrinkage calculator for perfect results even on non pre-shrunk fabric.

Print Client & Spooler for simple job management and fast re-prints.

Compatible with Fluor inks and Fluor color library.

Repeat Print allows multiple copies of a job to be printed without visible gaps. Ideal for long production runs.

Step & Repeat functionality allows users to produce mirrored and shifting patterns.

Spot Colour printing & Colour replacement allows for excellent colour reproduction & easy graphic adaption.

Job Cost calculation calculates the ink, material and printer cost per job.
